

## LABAIK TEAM CAR

The Labaik Car has been developed by Fujairah Natural Resources Corporation (FNRC) To collect basic information & communicate it to the Operation room

### 1st vehicle of Labaik Team

- Wind speed.
- Wind direction
- Noice measurement (dB)
- Measuring Total Suspended Particles
- Measuring Total Suspended Particles PM 10 Micron
- Measuring Total Suspended Particles PM 2.5 Micron
- Measuring Total Suspended Particles PM 1 Micron

### Second mounted Instrument

- Measuring of lower explosive limit
- Measuring percentage of Oxygen in air
- Measuring percentage of Hydrogen Sulphide in air (H<sub>2</sub>S)
- Measuring percentage of Carbone mono oxide in air (CO)

### Third Mounted Supporting Instrument

- Plugging of computer multiple tasks in to online network
- Mounted Camera addition to moving DVR
- Exploring of inaccessible place by Drone camera.
- Live broadcasts from site to the control room.
